Soil Health Card- addressing nutrient deficiencies in soil

5352 Soil Health Cards issued under Model Village Programme & UT Plan to farmers of A&N Islands

Farmers urged to get their soil assessed for issuance of Card

Port Blair, Jan. 10

In the absence of scientific analysis of soil, blindfolded applications of fertilizer and growth supporters have been used on the farm lands. This not only results in unwanted expenditure for the farmers but also affects the soil health negatively. To address this problem, the Soil Health Card Scheme was launched by the Prime Minister on 19th of Feb, 2015 and is being implemented by the Govt. of India, Ministry of Agriculture.

The main objective of this programme is to issue Soil Health Cards, every 3 years to all farmers, so as to provide a basis to address nutrient deficiencies in fertilizer application practices besides it also aims to ensure quality control requirements of fertilizers, bio-fertilizers and organic fertilizers under the Fertilizer (Control) Order

Based on these parameters, fertilizer recommendations and soil amendment required for the cultivable area is also indicated. The requirement of the specific nutrients is brought out with suggestion of suitable fertilizers both in organic and inorganic form. During 2019-20, a total of 5352 Soil Health Cards have been issued under Model Village Programme and UT Plan.
