Chief Secretary launches "Plant Vegetables, Fruits, Flowers, Community Garden and Save Seeds Campaign Vision 2047-Processed Food Exports"

Calls upon all Departments, Organizations, Individuals to join the movement and make it a mass movement to achieve food security **Mission is to transform Andaman as a Community Garden of Fruits & Vegetables and needy can pluck without any restriction** **Motto of this mission is "no one should sleep empty stomach"** **A&N Police, A&N Command, Forest Deptt., PBMC, CIARI & all Departments of A&N Administration onboard the mission**

Port Blair, July 25

The Chief Secretary, A&N Administration, Shri Jitendra Narain launched "Plant Vegetables, Fruits, Flowers, Community Garden and Save Seeds Campaign Vision 2047-Processed Food Exports" today at Sippighat Agriculture Farm. Addressing the gathering, the Chief Secretary stated that all Departments should play a catalytic role in the success of this mission which will provide food security to all in A&N Islands. Opining that this campaign is a Vision - 2047 for the A&N Islands, he mentioned that with the cooperation of all stakeholders and the people, we can achieve the goal of turning the Islands as a major exporter of fruits and processed food. He exhorted the citizens to strive to turn this mission into a people's movement and appealed to individuals/ organizations and others to plant saplings of fruit bearing trees in the campus of Sippighat Agriculture Farm on the occasion.

Elaborating on the vision 2047, the Chief Secretary informed that there are 200 components associated with this mission and we are planning to take up one component on every Sunday. The first and foremost aim of launching of this campaign is to lessen the dependency of vegetables and fruits from mainland. There should be a systematic plantation of vegetables and fruit bearing trees so that people can easily reap the vegetable and fruits for their consumption, he said. The Chief Secretary stated that for its value addition and agro - plantation, the Industries

Department will look after it in the next stage.

Dwelling upon the objective of the mission, he said, "Our aim is that no one should remain without food during situations like pandemic, lockdowns, blockade or war". The motto of this mission is "no one should sleep empty stomach". The labourers need vegetables and during this season, the rates of the vegetables were very high and this mission, he said will help in feeding the vulnerable section

of the society. He said, jackfruit is a wonder fruit which can be grown abundantly as the climatic condition of these Islands is best suited for planting this tree. He desired that fruit/vegetables should be grown in roadside patches and this, he said, will help in minimizing encroachment of roadside patches. "Wherever a blank grey patch is available, we should plant fruit and vegetable saplings and anyone can reap that vegetable or

fruit", he said adding that to achieve this goal, islanders have to come forward. This mission will transform the whole Andaman as a 'Community Garden' where anyone can pluck fruits and there will be no restriction. "My dream is to convert one Island with one fruit and that island will become net exporting Island", he said.

The Chief Secretary mentioned that the Forest Department which spends Rs 20 crores for planting of trees in the Islands, this time will focus on planting fruit bearing saplings as it also protect the environment and soil erosion. The Forest Department has done a good job by giving more emphasis on planting fruit bearing trees. He said, all the Departments should reach to the people and enquire from them which place is suitable in their opinion for taking up plantation. To make the mission successful, he opined that every single patch has to be given to individuals, community groups so that better management of the saplings planted can be done. The task cannot be accomplished by the Administration alone and the cooperation of general public/organizations is also equally important for the success of the mission.

The Chief Secretary also called upon the Police Department and A&N Command to popularize this initiative. "My vision is to plant fruit bearing trees/flowering trees along the entire stretch of NH upto 300 KM. There is need to plant 10 KM roads with white and pink colour of Mussaenda which starts flowering within 8 months. In this direction, the Chief Secretary asked the APWD

Pradhan Mantri Suraksha Bima Yojana

73,393 persons insured under the scheme in A&N Islands

Staff Reporter

Port Blair, July 25

The Pradhan Mantri Suraksha Bima Yojana (PMSBY) is a social security scheme started by the Ministry of Finance to provide insurance in case of disability or death. The premiums fixed are low in order to ensure that the policyholder is given the benefits at the earliest. It is an accident insurance scheme launched by the Govt. of India with an aim to bring the uninsured population under insurance cover. This accident

	Table of Benefits	Sum Insured
a	Death	Rs. 2 Lakh
b	Total and irrecoverable loss of both eyes or loss of use of both hands or feet or loss of sight of one eye and loss of use of hand or foot	Rs. 2 Lakh
c	Total and irrecoverable loss of sight of one eye or loss of use of one hand or foot	Rs. 1 Lakh

insurance scheme offers a one-year accidental death and disability cover, which can be renewed annually.

As per the data received from the Lead Bank Port Blair, altogether, 73,393 persons have been enrolled under Pradhan Mantri Suraksha Bima Yojana (PMSBY) in these Islands as on June 30, 2021. A total of 10 claims received under this insurance scheme stood at 10, out of which 5 claims were settled while one claim is pending and other four were rejected. Of the 5 claims settled, Rs. 10 lac were disbursed to 5 insured

Empowering women through NRLM scheme

"NRLM not only paved my way to success but also uplifted my identity"; says beneficiary

Port Blair, July 25

Women empowerment is one of the main pillars for the development of the rural economy. A prosperous rural economy is impossible without women empowerment, as women seem to be the main driving force for the economy to develop and prosper. One of the best examples of self employed women around us is Smt. Rita Sadhak, who is doing a remarkable job by starting a petty shop for her livelihood. Help Group since 2019 said, she explained her past, Smti. Rita

Diglipur Block and one of the beneficiaries of the DAY-Sadhak, a rural woman in

livelihood by opening a Petty Shop by taking a loan of Rs.35,000/- from VO, which she has repaid successfully.

Presently, she is running her shop from her home and supporting her family financially. At present, she is earning sufficient amount to support her husband to sustain the financial needs of her family and is setting an example of women empowerment. The transformation in her life is because of social and financial support provided by her Self

APWD repairs damaged road at Delanipur

Port Blair, July 25

The APWD has repaired the damaged road at Delanipur wherein a big chunk of road sunk by creating a big hole of more than 3 mtrs. on July 24. The road was constructed more than 50 years back and recently overlaid as part of improvement. The A&N Police diverted the traffic to avoid any untoward incident. Immediately, about the report of damage of road, the Superintending Engineer, Shri H. M. Lingaraju along

with other Engineers inspected the site and took measures to restore the road.

An inspection was carried out during which it was observed that the sink portion happened due to seepage of water from the adjoining drain. Immediately, mobilisation of men machinery and material was done and the sunken portion was restored by night and was opened for light traffic yesterday. Today, further action was taken to restore the

Media briefed on COVID-19

One corona positive case detected during RT-PCR conducted on flight passengers: Director (IP&T)

Port Blair, July 25

During the RT-PCR test conducted on 331 passengers who arrived here yesterday, one corona positive case has been detected. This was disclosed by the Director (IP&T), Shri Alok Kumar briefing the media persons on COVID-19 status in the Islands held in the conference hall of IP&T here this evening. He informed that 356 persons bound for Middle & North Andaman were tested at Ferrargunj and two positive cases have been found. Today, 3 flights with 518 passengers arrived here and the results of RT-PCR reports are awaited. The District Administration conducted

mobile RAT screening at South Wandoor today. The random tests conducted on 81 persons, showed encouraging result as all the samples tested were found negative.

While giving the update about the vaccination drive, the Director said that it is continuing and today till 3 pm 401 beneficiaries were vaccinated at N&M Andaman, out of which, 398 were in the

'Afforestation and Go Green' drive by ANIIMS

Embarks on a mission to plant 3000 saplings in the campus during this monsoon season

Port Blair, July 25

As a part of afforestation drive and 'Go Green' endeavor, which started in 2019 in ANIIMS new campus at Dudhline near Corbyn's Cove is continuing this year too. This year, plantation drive started on 3rd July in collaboration with Department of Forest and KHV & hundreds of saplings were planted in the campus on that day. The drive continued and another 200 flowering and ornamental plants were

planted on July 18. ANIIMS, Dr. A.K. Students, faculties and staff of ANIIMS are continuing the tree plantation drive and have planted around 400 flowering and fruiting plants till date. Sharing about the drive with DT, the Director (Prof.),

and NHIDCL, who are instrumental in developing roads to carry out planting of Mosanda by utilizing their fund. He said, 0.01% of their funds should be spend on road side tree plantation and then only, we can make the Islands a 'Garden of Eden'. The variety of jackfruit and drum stick needs to be propagated.

The Chief Secretary asked all the Deputy Commissioners and Superintendents of Police to find patches and the seeds will be provided to the people by the Administration to plant it. Thereafter, the Industries Department will chalk-out the plans for food processing. The Forest Department and CIARI will suggest the Administration how much saplings have to be planted in one place. He said, every Sunday there will be voluntary campaign to plant trees. We are also planning to construct 1000 ponds for 'Digi Macchi'. For finding perennial sources of water, the Chief Secretary said the Territorial Army and Forest Guards will be assigned the task and suitable reward will also be instituted as an encouragement.

if a person takes nutritious foods, then he can keep the medicines at bay.

The Director General of Police, Shri Satyendra Garg said that since the beginning of this campaign, the Police Department has chalked out a yearlong programme on a sustainable level for planting of vegetable and fruit bearing trees in all the police complexes, stations, Fire Brigade Units, LoPs. He said more focus is given on the locally grown vegetables and fruits and more than 900 fruit bearing saplings have been planted so far in different police stations and units. Our goal is not to increase the number of planting materials but we are ensuring that the planted saplings are grown properly and is raised serving the purpose. He said, everyone should know about nutrition and

The Chief of Staff, A&N Command, Rear Admiral, DS Gujral thanked the A&N Administration for involving A&N Command in this all important drive of save seed and plant fruit sapling. He said Defence personnel are actively involved in the propagation, conservation and preservation of environment. He said, usually, we throw seeds after having fruits, but the seeds can be saved very easily for its further plantation in our kitchen garden or backyard. Vision 2047 envisages food availability to all and is a welcome step. He assured all support from the A&N command for this all important and meaningful drive. Speaking on the occasion, the

APCCF, Deptt. of Environment & Forests, A&N Administration, P. Subramanyam elaborated on the techniques of how to conserve seeds into planting materials. He said for saving a seed one must eat a fruit first which has good nutrition level for every individual. He said to save seeds we have to collect seeds both at the Institutional levels as well as request the communities to be a part of this good programme. He said, plantation drive can also be taken up through school 'Eco-Clubs' and 'School Nursery' programmes.

In his address, the Director, ICAR-CIARI Port Blair, Dr. Eaknath B. Chakurkar said that A&N is very Specific Island area having rich source of biodiversity with variety of plants and CIARI works on survey, conservation, evaluation and economic viable use in the society. He also advised to plant 'bread fruit' (small katha/jackfruit) graded as the plant of the future and CIARI has distributed 200 saplings of small jackfruit for its planting in North & Middle Andaman.

Earlier, in her welcome address, the Secretary, Agriculture, Ms. Veditha Reddy said that this campaign is being launched by the A&N Administration to ensure food security in the Islands. There are different components in this campaign which include planting vegetables and fruits in Govt. complexes and public places to ensure food security. The mission aims to plant flower saplings along the road side for beautification and create awareness on how to generate saplings out of the saved seeds and plant them.

The Deputy Commissioner of North & Middle Andaman, Dr. (Smti.) Angel Bhati Chauhan and Deputy Commissioner, Nicobar District, Shri Yash Chaudhary also attended the function through virtual mode.

The function concluded with the vote of thanks proposed by the IAS Probationer, Ms. Yashaswini.

Vaccination- shield against the virus
2,77,071 lakh eligible beneficiaries vaccinated in Isles so far

Port Blair, July 25
The safety of the citizens is the foremost priority of the Administration, especially during this pandemic time. To shield its citizens from the corona virus, the vaccination of eligible beneficiaries is being initiated by the Administration in different parts of the Islands. Accordingly, the vaccination began with administering of COVISHIELD vaccine for Health Care Workers followed by frontline workers and vulnerable population with co-morbidities. Subsequently, the vaccination for 45 and above was initiated

Vaccination drive at Dr. RP Hospital, Mayabunder

Islands, out of the target beneficiaries of 2, 81, 603 (approx.). A total of 548 people were vaccinated today in A&N Islands. In South Andaman District, 44 beneficiaries in the age group of 18-44 years were vaccinated. Similarly, 413 beneficiaries were vaccinated in North & Middle Andaman District out of which, 403 were in the age group of 18-44 years. In Nicobar District, 91 beneficiaries were vaccinated, out of which, 62 were in the age group of 18-44 years. A total of 79,855 eligible people in the age group of 18 to 44 years have been vaccinated so far in A&N

PU cancels first year odd semester exam scheduled from July 26

Port Blair, July 25
The Controller of Examination Pondicherry University has cancelled the first year odd semester examination scheduled from July 26, 2021 and

has issued directions to Principals of JNRM and ANCOL to assess result based on internal assessment marks. For further information students may contact concerned Heads of the Department. It is to mention that the news item published in the issue dated July 25 that PU Exams will be held on July 26 has been published inadvertently and the error is regretted.

APWD repairs damaged ... (Contd. from page 1)

road with metalling to normalise for all types of traffic. The bituminous work will be done after the weather condition improves. Action has also been initiated to plug the seepage. The immediate action of the Department avoided any major traffic disruption in the area, a press release from APWD said.

Media briefed on COVID-19 ... (Contd. from page 1)

age group of 18-44 and the rest were about 45+.
The Director, ANIIMS, Dr. A.K. Mandal informed that the number of corona positive patients admitted in the G. B Pant Hospital is presently 2 and no patient is on Oxygen support. The Deputy Director, GB Pant Hospital, Dr. Amitabha De said that three patients are being taken care of at ITI COVID Care Centre.

'Afforestation and Go Green' drive by ANIIMS... (Contd. from page 1)

and green venture at the new campus which is an important step towards afforestation to maintain the ecological balance.
The faculty in charge of the Green Campus drive told DT, "We are focusing mainly on the avenue concept of big blooming flowering and fruit bearing plants by the side of the roads and on cluster concept of plantation starting from the main entrance towards the hostel and faculty quarters. We have successfully planted Mango, Jamun, Cashew nut, Jack fruit, Bel, Tecoma, Casia fistula, Musseanda, Ashoka, Gulmohar, Casuarina, Coconut, Ixora, Karenga, Pynima, Allamanda, Hibiscus and different varieties of Croton. Our planted saplings of previous years have grown successfully fulfilling our aim to a great extent". "Last year we had planted 1500 saplings. We have a pond inside our campus which has been developed into a rain water harvesting system, where we have grown red water Lily successfully and various types of fresh water fish have been introduced with the help of Director, Department of Fisheries. This brought back rare variety of king fisher birds in the campus".

The students and the faculty's residing in the campus echoed the feeling of environmental conservation and their determination to convert the campus into an echo friendly and green campus. This year, for the first time, they have sighted number of wild birds and their nesting's near the pond and inside the campus.

It is to mention that the Andaman Avian Club visited the campus a few weeks back and were impressed by the biodiversity of the campus and the great efforts being taken by the ANIIMS to propagate it.

Empowering women through NRLM... (Contd. from page 1)

Help Group formed under DAY-NRLM scheme.
While expressing her gratitude towards the Department of Rural Development, Rita said that "I have fulfilled my dreams which would not have been possible if I was not in a SHG Group. NRLM not only paved my way to success but also uplifted my identity and value for work which helped to support my family and children's education".

The National Rural Livelihood Mission aims to alleviate rural poverty and create sustainable livelihood opportunities for the rural poor, especially rural women. The basic idea behind this programme of Government is to unite the poor into Self Help Group and make them capable of self-employment. NRLM, while empowering women is leading National Rural Economic Transformation, a press release received from Secretary (RD) said.

Pradhan Mantri Suraksha Bima Yojana... (Contd. from page 1)

persons (Rs. 2 lac for each claim).
According to the salient feature of the scheme, it is available to people in the age group 18 to 70 years with a bank account who give their consent to join/enable auto-debit on or before 31st May for the coverage period 1st June to 31st May on an annual renewal basis. Aadhaar would be the primary Know Your Customer (KYC) for the bank account. The risk coverage under the scheme is Rs. 2 lakh for accidental death and full disability and Rs. 1 lakh for partial disability.
A premium of Rs.12 per annum is to be deducted from the account holder's bank account through 'auto-debit' facility in one installment, as per the consent to be given on enrolment. Members may also give one-time mandate for auto-debit every year till the scheme is in force, subject to recalibration that may be deemed necessary on review of experience of the scheme.
In case of a joint account, all holders of the said account can join the scheme provided they satisfy the eligibility criteria and pay the premium at the rate of Rs.12 per person per annum through auto-debit.

English rendering of PM's address in the 79th Episode of 'Mann Ki Baat' on 25.07.2021

My dear countrymen, Namaskar. A few amazing pictures taken a couple of days ago, some memorable moments are still there in front of my eyes. Let us hence commence Mann Ki Baat this time, with those very moments. At the Tokyo Olympics, watching Indian sportspersons march carrying the Tricolour exhilarated not just me but the entire country...as if the whole country unitedly exhorted her warriors saying, "Vijayi Bhava - emerge victorious!" When these sportspersons had departed from India, I had the opportunity of chatting with them, knowing about them and conveying it to the country. These sportspersons have reached where they are after overcoming numerous hurdles in life. Today, they possess the strength of your love and support - that's why, come...let us together extend our good wishes to all of them; encourage them. On social media, our Victory Punch Campaign for the support of Olympics sportspersons has begun. Do share your Victory Punch with your team...Cheer for India.

Friends, it is but natural to get emotional in honour of the one who bears the Tricolour in honour of the country. This feeling of patriotism unites all of us. Tomorrow, that is the 26th of July is Kargil Vijay Diwas as well. The Kargil war is one symbol of the bravery and patience on part of India's Armed Forces which the whole world has watched. This time this pride filled day will be celebrated amid Amrit Mahotsav. That is why this day becomes all the more special. I wish you read the enthralling saga of Kargil...let us all bow to the bravehearts of Kargil.

Friends, this time on the 15th of August, the country is entering her 75th year of Independence. We are indeed very fortunate that we are witnessing 75 years of Freedom; a freedom that the country waited for, for centuries. You may remember, to commemorate 75 years of Freedom, Amrit Mahotsav had commenced on the 12th of March from Babu's Sabarmati Ashram. On this very day, Babu's Dandi Yatra too was revived...since then, from Jammu-Kashmir to Puduchery; from Gujarat to the Northeast, programmes in connection with Amrit Mahotsav are being held across the country. There are many such incidents, such freedom fighters whose contribution have been huge, but had not been adequately discussed...today, people are able to know about them. Now, take Moirang Day, for instance...the tiny town of Moirang in Manipur was once a major base of Netaji Subhash Chandra Bose's Indian National Army, INA. Here, even before Independence, Col Shaikat Malik ji of INA had unfurled the Flag. During Amrit Mahotsav, on the 14th of April, the Tricolour was once again hoisted at that very Moirang. Innumerable such freedom fighters and great men are being remembered by the country during Amrit Mahotsav. Programmes in that connection are being successively organized by the government and social organisations. A similar event is about to take place on the 15th of August this time...this is an endeavour connected with the National Anthem. It's an effort on part of the Ministry of Culture to have maximum number of Indians sing the National Anthem together. For this, a website too has been created - Rashtragan.in. With the help of this website, you can render the National Anthem and record it, thereby getting connected with the campaign. I hope you connect yourselves with this novel initiative. In the days to come, you will get to see many such campaigns and efforts. Amrit Mahotsav is not a programme of any government; neither a programme of any political party...it is a programme of crores and crores of Indians...a bow to our freedom fighters by every independent and grateful Indian. And the extension of the basic sentiment behind this festival is immense...the spirit entails treading the path of our freedom fighters...building a country of their dreams. Just the way champion proponents of Freedom had joined hands for the cause, we have to come together for the development of the country. We have to live for the country, work for the country...and in that, even the smallest of efforts too produce big results. We can contribute to nation building even while performing our routine chores...such as 'Vocal for Local'. Supporting local entrepreneurs, artists, craftsmen, weavers should come naturally to us. The National Handloom Day on the 7th of August is an occasion when we can strive to attempt that. National Handloom Day has a remarkable historic background. On this very day in 1905, the Swadeshi Andolan had begun.

Friends, in the rural and tribal regions of our country, handloom is a major source of income. This is a sector that comprises lakhs of women, weavers and craftsmen. Even small efforts on your part will give rise to a new hope in weavers. Do purchase something or the other and share your thought with others as well...now that we are celebrating 75 years of Independence, it of course becomes our responsibility. You must have noticed that year 2014 onwards, we often touch upon Khadi in Mann ki Baat. It is only on account of your efforts that today, the sale of Khadi has risen manifold. Could anyone even think that in any Khadi store, the sales figure would cross one crore rupees...But you have made that possible too. Whenever, wherever you purchase a Khadi product, it does benefit our poor weaver brothers and sisters. That is why, in a way, buying Khadi is service to people, service to the country. I urge you my dear brothers and sisters, to make it a point to definitely buy Handloom products being made in rural areas and share it on #MyHandloomMyPride.

Friends, when one refers to the freedom movement and Khadi, remembering revered Babu is but natural. Just the way the Quit India Movement, Bharat Chhoro Andolan steered under Babu's leadership, every countryman today has to lead a Bharat Jodo Andolan. It is our duty to ensure that our work helps closely knit, bind our India which is filled with diversity. Come, on Amrit Mahotsav, let us make a sacred Amrit resolve that the country remains to be our highest faith; our topmost priority. We have to move forward with the mantra 'Nation First, Always First'.

My dear countrymen, today I wish to express my special thanks to my young friends tuned in to Mann ki Baat. Just a few days ago, on part of MyGov, a study was conducted regarding the listeners of Mann ki Baat. In this study, primarily, people who send messages and suggestions were focused upon. The study revealed the fact that out of those sending messages and suggestions, close to 75% are below the age of 35...meaning thereby that the suggestions of the youth power of India are steering Mann ki Baat. I view this as a very good indicator. Mann Ki Baat is a medium which has positivity, sensitivity. In Mann Ki Baat, we talk about positive things; its character is collective.

This activism for positive thoughts and suggestions in the youth delights me. I am happy also about the opportunity that I get through 'Mann Ki Baat' to know of the minds of the youth.

Friends, suggestions received from you are the real strength of 'Mann Ki Baat'. It is your suggestions, through 'Mann Ki Baat', that express the diversity of India, spread the fragrance of service and sacrifice of Indians in all the four directions, inspire one and all through the innovation of our toiling youth. You send ideas of various kinds in 'Mann Ki Baat'. We are not able to discuss all of them, but I do send many of them to related departments so that further work can be done on them.

Friends, I want to tell you about the efforts of Saayee Praneeth ji. Saayee Praneeth ji is a Software Engineer, hailing from Andhra Pradesh. Last year he saw that in his area farmers had to suffer a lot due to the vagaries of weather. For years he had interest in meteorology. So, he decided to use his interest and talent for the welfare of farmers. Now he purchases weather data from different data sources, analyses them and sends necessary

information through various media to farmers in local language. Besides weather updates, Praneeth ji also gives guidance to people about what they should do in different climatic conditions... Especially how to be safe from floods or how to avoid storm or lightning, he talks about this too.

Friends, on the one hand this effort of a young software engineer touches our hearts; on the other the use of technology by one of our friends will amaze us. This friend Shriman Isaak Munda ji hails from a village in Sambalpur district of Odisha. Isaak ji once used to work as a daily wage but now he has become an internet sensation. He is earning a lot through his YouTube Channel. In his videos he shows prominently the local dishes, traditional ways of cooking, his village, his lifestyle, family and food habits. His journey as a YouTuber began in March 2020 when he posted a video related to Pakhal, the famous local dish of Odisha. Since then, he has posted hundreds of videos. This effort of his is different for many reasons. Specially because through this, people living in cities get a chance to watch the lifestyle about which they don't know much. Isaak Munda ji is celebrating by blending culture and cuisine equally and inspiring us too.

Friends, while we are discussing technology I want to discuss of an interesting subject. Recently you must have read, seen that a start-up established by an alumni of IIT Madras has made a 3D printed house. The construction of the house through 3D printing, how did this happen after all? Actually, this start-up first of all fed a 3 Dimensional design in a 3 D printer and then through a concrete of a special kind fabricated a 3 D structure layer by layer. You will be happy to know that many experiments of this kind are being done throughout the country. There was a time when it would take years to complete even a minor construction. But today due to technology the situation is changing in India. Some time ago we had launched a Global Housing Technology Challenge to invite such innovative companies from all over the world. This is a unique attempt of its kind in the country; hence we gave it the name Light House Projects. For now, work on Light House Projects is on at a fast pace at 6 different locations in the country. Modern technology and innovative methods are used in these Light House Projects. This reduces the duration of construction. Along with that, the houses that are constructed are more durable, economical and comfortable. Recently, through drones, I also reviewed these projects and saw live their work progress.

In the project at Indore, Pre-Fabricated Sandwich Panel System is being used in place of Brick-and-Mortar Walls. In Rajkot, the Light House is being made with French Technology in which through a tunnel Monolithic Concrete construction technology is being used. Houses made with this technology will be lot more capable of withstanding disasters. In Chennai, the Pre-cast Concrete system technologies from America and Finland are being used. By this, houses will get built faster and the cost too will be low. In Ranchi houses will be built using the 3D Construction System of Germany. In this, every room will be constructed separately and then the entire structure will be joined together the way block toys are joined. In Agartala, using technology from New Zealand, houses that can withstand major earthquakes are being made with steel frame. Meanwhile, in Lucknow technology from Canada is being used. In this plaster and paint will not be required and walls prepared in advance will be used to build houses faster.

Friends, today an attempt is being made in the country to ensure that these projects work as Incubation centers. Through this our planners, Architects, Engineers and students will know of new technology and experiment with them too. I am sharing these things especially with our youth so that in the interest of the nation they are encouraged towards technology in newer fields.

My dear countrymen, you must have heard of an English adage- "To learn is to grow" that is to learn is to progress. When we learn something new, doors to new advances open up automatically for us. Whenever effort to do something new, different from the rut, has been made, new doors have opened for humankind, a new era has begun. And you must have seen whenever something new happens anywhere, its result surprises everyone. Now, for example, if I ask you which the states that you would connect with Apples are? Obviously in your mind first of all the name of Himachal Pradesh, Jammu-Kashmir and Uttarakhand would strike. But if I ask you to add the name of Manipur too to this list you will probably be filled with surprise. Youths filled with passion to do something new have demonstrated this feat in Manipur. Nowadays apple farming is picking up fast in the Ukhrul district of Manipur. Farmers here are growing apples in their orchards. To learn apple farming these people have taken formal training by going to Himachal. One of these is T S Ringphami Young. By profession he is an aeronautical engineer. He along with his wife Shrimati T S Angel has grown apples. Similarly, Avungshee Shimre Augasteena too has grown apples in her orchard. Avungshee had a job in Delhi. She returned to her village quitting this and started farming apple. There are many such apple growers in Manipur who have demonstrated something different and something new.

Friends, in our tribal communities, Ber fruit has always been very popular. The members of the tribal community have always been cultivating Ber. But its cultivation is increasing especially after the COVID-19 pandemic. Bikramjit Chakma of 32 years of age is my young friend from Unakoti, Tripura. He has not only earned a lot of profit by starting the Ber cultivation; Now he is also motivating people to do Ber cultivation. The state government has also come forward to help such people. Many special nurseries have been started by the government for this purpose so that the demand of the people associated with the cultivation of Ber can be met. Innovation is happening in agriculture, so creativity is also being witnessed in the by-products of agriculture.

Friends, I have also come to know about an attempt made in LakhimpurKheri in Uttar Pradesh. A unique initiative has taken place in LakhimpurKheri during the period of COVID itself. Here, the work of training women to manufacture fibre from the waste banana stems was started. The way to make the best out of the waste. Banana fibre is prepared by cutting the stem of a banana with the help of a machine, the fibre is like jute or flax. Handbags, mats, rugs, many things are made from this fibre. Through this, the utilization of crop waste started, on the other hand our sisters and daughters living in the village acquired another source of income. Through this work of Banana fibre, a woman from the area earns four to six hundred rupees per day. Banana is cultivated on hundreds of acres of land in Lakhimpur Kheri. After the harvesting of banana, the farmers usually had to spend a separate sum to dispose of its stem. Now not only their money is being saved; and lending credence to the saying of 'Getting two of something, for the price of one!'

Friends, on the one hand products are being manufactured from banana fibre; on the other, delicious dishes like dosa and gulabjamun are also being made from banana flour. Women in Uttara Kannada and Dakshina Kannada districts of Karnataka are doing this unique work. This endeavour also began in the Corona period itself. These women not only prepared things like dosa, gulabjamun from banana flour; they also shared their pictures on social media. When more people came to know about the banana flour, its demand also increased and so did the income of these women. Like Lakhimpur Kheri, here too, women are leading this innovative idea.

Friends, such examples become the inspiration to do something new in life. There must be many such people around you too. When your family is involved in close conversations, you should also make these a part of your chat. Take out some time and go to see such efforts with children and if you get the opportunity, do something like this yourself. And yes, I would like it if you share all this with me on Nammo App or MyGov.

My dear countrymen, there is a verse in our Sanskrit texts -

आत्मार्थम् जीव लोके अस्मिन्, को न जीवति मानवः |

परम् परोपकारार्थम्, यो जीवति स जीवति ||

Atmantharmjeevalokeasmin, ko na jeevitimanavah.

Paramparopkarartham, yojeevatisajeevati ||

That is, everyone in this world lives for himself. But in actuality only the person who exists for the sake of others really lives. Talking about the philanthropic efforts of the sons and daughters of Mother India is what 'Mann Ki Baat' is all about. Today also, we'll talk about some of these friends. One of our friends hails from Chandigarh city. I too, have lived in Chandigarh for a few years. It is a very cheerful and beautiful city. The people of Chandigarh are also large hearted and yes, if you are a foodie, you will have more fun here. In Sector 29 of Chandigarh, Sanjay Rana ji runs a food stall and sells Chole-Bhature on his cycle. One day his daughter Riddhima and niece Riya came to him with an idea. Both requested him to feed chole-bhature for free to those who had got the COVID Vaccine. He happily agreed to the suggestion and immediately started this good and noble effort. To eat Sanjay Rana ji's chole-bhature for free, you have to show that you have got the vaccine administered on the very day. As soon as you show the vaccination message he will give you delicious Chole-Bhature. It is said that for the welfare of the society, spirit of service and duty are required more than money. Our Sanjay Bhai is proving this saying to be right.

Friends, I would like to discuss another such work today. This effort is being attempted in Nilgiri of Tamil Nadu. Here Radhika Shastriji has started the AmbuRx (Amburex) Project. The purpose of this project is to provide easy transport for the treatment of patients in hilly areas. Radhika runs a cafe in Coonoor. She raised funds for AmbuRx from her cafe colleagues. Today six AmbuRx are serving in the Nilgiri hills and are coming to the aid of patients in remote parts during the time of emergency. An AmbuRx is equipped with a Stretcher, Oxygen Cylinder, First Aid Box and other things

Friends, whether it is Sanjay ji or Radhika ji, their examples demonstrate that we can render service while doing our routine work, our business or job.

Friends, a few days back a very interesting and very emotional event occurred, which imparted new strength to India-Georgia friendship. In this ceremony, India handed over the Holy Relic or icon of Saint Queen Ketevan to the Government of Georgia and the people there, for this mission our Foreign Minister himself went there. The ceremony, which took place in a very emotionally charged atmosphere, was attended by the President of Georgia, the Prime Minister, many religious leaders, and a large number of Georgians. The words that were said in praise of India in this ceremony are indeed very memorable. This single ceremony has not only strengthened the relations between the two nations but as well as between Goa and Georgia. This is because these holy relics of Saint Queen Ketevan were found in 2005 from Saint Augustine Church in Goa.

Friends, the question arising in your mind must be...what is this matter all about and when and how did this happen? Actually, this is an incident about four to five hundred years ago. Queen Ketevan was the daughter of the royal family of Georgia. In 1624 after ten years of imprisonment she was martyred. According to an ancient Portuguese document, the mortal remains of Saint Queen Ketevan were kept in the Saint Augustine Convent of Old Goa. But, for a long time it was believed that her remains buried in Goa were lost in the earthquake of 1930.

After decades of tireless efforts by the Indian government and Georgia's historians, researchers, archaeologists and the Georgian Church, the relics were successfully discovered in 2005. This is an extremely emotional topic for the people of Georgia. That is why keeping in mind their historical, religious and spiritual sentiments, the Government of India decided to gift a part of these relics to the people of Georgia. Today, I would like to thank the people of Goa for preserving this unique side of the shared history of India and Georgia. Goa has been the land of many a great spiritual heritage. Saint Augustine Church is a UNESCO's World Heritage Site - a part of the Churches and Convents of Goa.

My dear countrymen, let me now take you straight from Georgia to Singapore, where another glorious opportunity arose earlier this month. The Prime Minister of Singapore and my friend, Lee Hsien Loong inaugurated the recently renovated Silat Road Gurudwara. He also wore the traditional Sikh turban. This Gurudwara was built about a hundred years ago and there is also a memorial dedicated to Bhai Maharaj Singh. Bhai Maharaj Singh ji fought for the independence of India and this moment becomes more inspiring when we are celebrating 75 years of independence. The people to people strength between two countries gets a boost with such initiatives and efforts. These also show how important it is to live in a harmonious environment and understand each other's culture.

My dear countrymen, today in 'Mann Ki Baat' we have discussed many topics. There is another subject which is very close to my heart. It is the topic of water conservation. The place where I spent my childhood, there was always shortage of water. We used to yearn for rain and thus saving every drop of water has been a part of our traditions, our sanskar. Now this mantra of "Water conservation through public participation" has changed the picture there. Saving every drop of water, preventing any kind of wastage of water... it should become a natural part of our lifestyle. Such a tradition should be made in our families, which would make every member proud.

Friends, the protection of nature and environment is embedded in the cultural life of India, in our daily lives. At the same time, rains and the monsoon have always shaped our thoughts, our philosophy and our civilization. In 'Ritusanhar' and 'Meghdoot', the great poet Kalidas has beautifully described the rains. These poems are still very popular among literature lovers. The magnificence of rains is also beautifully described in the Parjanya Suktam of Rigveda. Similarly, the relationship between the earth, the sun and the rain has been elaborated in a poetic form in the Srimad Bhagavata.

अष्टौ मासान् निषीतं यद्, भूम्याः च, ओद-मयम् वसु |

स्वर्गोभिः मोक्तुम् आरेभे, पर्जन्यः काल आगते ||

That is, the Sun has exploited the earth's wealth in the form of water for eight months, now in the monsoon season, the Sun is returning this accumulated wealth to the earth. Indeed, the monsoon and rainy season is not only beautiful and pleasant, but it is also nurturing, life-giving. The rain water that we are getting is for our future generations, we should never forget that.

Today a thought came to my mind that why not end my talk with such interesting references. My very best wishes to all of you for the forthcoming festivals. At the time of festivals and celebrations, you must remember that Corona has not yet gone from amongst us. You must not forget the protocols related to Corona. **May all of you be healthy and happy.**

Many many thanks! (Source: PIB)

COVID-19: Wash your hands regularly using soap and water or an alcohol-based hand rub.
