Department of Fisheries, GOI approves Rs.199.24 crore Smart & Integrated Fishing Harbour at Mayabunder Paving the way for the growth of fisheries infrastructure in A&N Islands

New Delhi, Jan. 28 (PIB) The Department of Fisheries, Ministry of Fisheries, Animal Husbandry and Dairying, Government of India, has approved the proposal of the Andaman & Nicobar Administration for the "Development of Smart and Integrated Fishing Harbour at Mayabunder" at an estimated cost of Rs. 199.24 crore with 100% Central Financial Assistance under the Pradhan Mantri Matsya Sampada Yojana (PMMSY).

The Smart and Integrated Fishing Harbour, developed in line with the Blue Port Initiative, will incorporate safe landing and berthing facilities, supported by latest technology and IoT-enabled systems. The

harbour integrates fisheries management, enhanced fish-handling capacity, improved operational safety, energy-efficient systems, and digital traceability. It is expected to generate employment, enhance stakeholder incomes, strengthen livelihoods, and contribute to combating Illegal, Unreported and Unregulated (IUU) fishing through environmentally friendly approaches, thereby supporting India's progress towards the Sustainable Development Goals (SDGs). The Development of the Smart and Integrated Fishing Harbour will create safe landing and berthing facilities for 430 fishing vessels and cater to an annual fish landing of 9,900 tonnes. The project is expected to generate employment opportunities across the fisheries value chain and significantly benefit the fisheries sector.

The Andaman & Nicobar Islands possess a vast marine resource base with 6 Lakh sq. km of Exclusive Economic Zone (EEZ) and an estimated 60,000 MT of tuna and tuna like species, including 24,000 MT of Yellowfin and 2,000 MT of Skipjack tuna. To catalyse investment and value chain development, the Department of Fisheries organized an Investors Meet on "Investment Opportunities in Fisheries and Aquaculture Sector of Andaman & Nicobar Islands" on 14th November, 2024 at Swaraj Dweep, under the leadership of Shri Rajiv Ranjan Singh, Union Minister of Fisheries.

A&N Islands awarded best Union Territory/ State under Ayushman Bharat PMJAY

Sri Vijaya Puram, Jan. 28 The Andaman & Nicobar Islands has been awarded as the Best Union Territory/ State under the category 'Treatment of Beneficiaries - Ayushman Bharat Pradhan Mantri Jan Arogya Yojana (AB-PMJAY)' during the Chintan Shivir held from Jan. 19 to 20, 2026 at Bhubaneswar, Odisha. The award was conferred during the two-day Chintan Shivir organized by the National Health Authority (NHA) and was presented by Smti. Anu

Garg, Chief Secretary, Odisha, in recognition of the Union Territory's outstanding performance and effective implementation of the AB-PMJAY scheme. The Union Territory was particularly recognized for its focused initiatives aimed at reducing the financial burden on beneficiaries by providing transport assistance and wage-loss compensation, thereby significantly reducing out-of-pocket expenditure,

especially for patients referred to empaneled mainland hospitals under portability cases. To mitigate the hardships faced by beneficiaries undergoing treatment outside the Islands, the UT Administration of Andaman & Nicobar Islands, through the State Health Agency (SHA), has implemented a structured Transport and Wage Loss Compensation mechanism under AB-PMJAY. Under this initiative, beneficiaries

are provided transport assistance of up to Rs.40,000 per referral and wage-loss support at the rate of Rs.1,000 per day for a maximum period of 20 days, subject to prescribed guidelines, with the expenditure met from funds earmarked by the UT Administration. The Transport and Wage Loss Compensation scheme has been in operation since the year 2020. From its inception till date, a total of

1,659 claims have been received and settled, with an expenditure of Rs. 2.78 crore incurred by the UT Administration. This sustained financial support has played a significant role in reducing out-of-pocket expenditure and ensuring timely access to quality healthcare services for beneficiaries referred to empaneled mainland hospitals, a press release received from Nodal Officer (AB-PMJAY), A&N Islands said.

ONGC Begins Andaman Offshore Drilling, Scouts Global Tech Partners To Boost Western Offshore Output

ONGC has begun drilling the AND-P-1 well in the frontier Andaman Basin while seeking global technical partners to boost output from ageing western offshore fields

State-owned Oil and Natural Gas Corporation (ONGC) is accelerating efforts across frontier exploration, offshore redevelopment and global technical partnerships as it seeks to arrest production decline from ageing fields while strengthening India's long-term energy security.

In a significant milestone for domestic exploration, ONGC has successfully spudded a critical stratigraphic well in the frontier Andaman offshore region, even as it scouts for global technical partners to revive production from its western offshore assets and deploys advanced digital technologies to optimise operations.

ONGC recently spudded the stratigraphic well AND-P-1 on January 27, 2026, in the deepwater Andaman offshore basin, around 267 nautical miles from the Andaman and Nicobar Islands. (Representational Image/AFPI)

Andaman Offshore: Testing India's Frontier Energy Potential

ONGC recently spudded the stratigraphic well AND-P-1 on January 27, 2026, in the deepwater Andaman offshore basin, around 267 nautical miles from the Andaman and Nicobar

Islands. The operation forms a key part of the government's Samudra Manthan campaign, aimed at unlocking India's untapped offshore hydrocarbon potential and reducing dependence on energy imports. The Andaman basin is considered geologically complex and logistically challenging, with steep water depths, difficult seabed conditions and limited existing infrastructure. However, it is also seen as one of India's most promising frontier basins, with ONGC having already drilled three wells in the region, indicating the presence of hydrocarbons.

Speaking on the sidelines of India Energy Week 2026, Pankaj Kumar, Director (Production), ONGC, said while basinal presence and hydrocarbon indications have been established, commercial viability will depend on further seismic interpretation and drilling outcomes. "Hydrocarbon presence is there, but commerciality in deepwater depends on multiple factors, scale, location, distance from shore and development economics. At this stage, it would be premature to commit timelines or volumes," Kumar said.

He added that the Andaman region remains a strategic focus area for both the government and ONGC, with further drilling and evaluation decisions to be taken after analysing data from the ongoing stratigraphic well.

Western Offshore Revival: ONGC Looks Beyond Mumbai High

Alongside frontier exploration, ONGC is intensifying efforts to revive production from its mature western offshore fields, which have seen output decline over the years due to depletion

Fisheries, Animal Husbandry & Dairying and Panchayati Raj. Investors specializing in tuna fishing technologies, seaweed, and allied infrastructure participated. Under PMMSY, the Department has also notified a Tuna Cluster in the Islands to strengthen infrastructure, training, investor partnerships, and global competitiveness.

India's fisheries sector has experienced robust growth, supported by public investments of over Rs. 39,000 crore in production, infrastructure, technology, fisher welfare and post-harvest value chains. Fish production has more than doubled over the past decade from 96 lakh tonnes in 2013-14 to around 197.75 lakh tonnes in 2024-25. Seafood exports have also doubled in value, reaching Rs. 62,408 crore, with over 350 product varieties exported to nearly 130 countries.

The approval of the Mayabunder Smart and Integrated Fishing Harbour is a strategic intervention to unlock the fisheries potential of the Islands and strengthen India's pathway towards achieving One Lakh crore seafood exports by 2030-31.

Background - PMMSY Interventions in Andaman & Nicobar Islands

Under the Pradhan Mantri Matsya Sampada Yojana (PMMSY), the Andaman & Nicobar Islands have witnessed substantial strengthening of fisheries infrastructure and livelihood support systems, with a total investment of Rs. 5,573.02 lakh. These investments have enabled the creation of a comprehensive fisheries ecosystem across production, post-harvest management, value addition, transportation, and fisher welfare.

Support under PMMSY has enabled large-scale development across aquaculture, hatcheries, open-sea cage farming, ornamental fisheries, value-add enterprises, cold-chain logistics, fish transport, and community support systems. Major outcomes include establishment of 5 freshwater finfish hatcheries, 7 backyard ornamental rearing units, 23.2 ha of new brackishwater ponds, 17.9 ha of freshwater grow-out ponds, and multiple units for fish feed production, insulated vehicles, refrigerated transport, fish kiosks, and bio-toilets for mechanised vessels. The scheme also facilitated livelihood and nutritional support to 1,000 traditional fisher families, deployment of 280 Sagar Mitras with IT-enabled service delivery, and modernisation/expansion of cold chain through new and upgraded 10-20 ton facilities.

PMMSY interventions have strengthened the value chain from harvest to market through ice plants, cold storages, insulated vehicles, e-rickshaws with ice boxes, and fish value-add units, while improving safety and traceability with 300 communication/tracking devices for fishing vessels. By enabling sustainable expansion in both inland and marine fisheries, PMMSY has laid the foundation for improved incomes, employment generation, greater resilience of coastal communities, and readiness for enhanced export-oriented development across the Andaman & Nicobar Islands.

and ageing infrastructure.

The company has floated a tender to appoint a Technical Service Provider (TSP) for its western offshore fields, excluding the Mumbai High field, following encouraging results from a similar partnership with BP in Mumbai Offshore.

"We are now in the market for another TSP covering the Western Offshore, excluding Mumbai High. The tender has been floated, and we have personally reached out to the CEOs of 10 major E&P operators, including Shell, BP, Chevron, Exxon and others," Kumar said.

He clarified that ONGC is not looking for service contractors, but only established exploration and production (E&P) operators with global offshore experience. The bid submission deadline is March 16, with ONGC targeting closure around June, subject to data-room reviews and technical discussions.

The move comes at a time when ONGC is grappling with long-term production decline from legacy assets. The Mumbai High oilfield, discovered in 1974 and producing since 1976, has been a cornerstone of India's offshore oil production but has faced sustained natural decline.

BP Partnership Delivers Early Gains

To arrest this decline, ONGC appointed BP as the TSP for Mumbai High in April 2025. Under the arrangement, BP operates purely as a technical service provider, with no participating interest in the asset. The agreement includes a fixed fee for the initial two years, after which compensation is linked only to incremental production.

"All ownership remains with ONGC, and national interest has been fully safeguarded," Kumar said. The results, he added, are already visible. Since BP mobilised its team, the production decline in Mumbai Offshore has been stabilised. ONGC has added around 3,500-4,000 barrels of oil per day and 2-2.5 million standard cubic metres per day (MMSCMD) of gas above the minimum baseline.

"Importantly, current production is already above the agreed baseline profile, which gives us confidence in this model," Kumar said, adding that lessons from the Mumbai Offshore partnership are now being extended to the broader western offshore.

ONGC operates some of India's most critical offshore assets in the Arabian Sea, including Mumbai High, Bassein, Heera, Neelam, Panna-Mukta, and Tapti, along with multiple satellite fields. Onshore, it operates mature producing fields in Gujarat's Cambay Basin such as Ankleshwar, Mehsana and Nawagam.

Balancing Maturity With Frontier Ambition

Taken together, ONGC's strategy reflects a dual focus: squeezing additional value from mature assets through technology and partnerships, while simultaneously testing high-risk, high-reward frontier basins such as Andaman.

"Hydrocarbon presence is confirmed in Andaman, but commercial success will depend on how the data unfolds," Kumar said. "Our approach is disciplined, deploy technology, collaborate where needed, and execute projects faster." (Source: https://www.etvbarhat.com)

Further, the Deputy Commissioner directed all concerned Departments to strictly adhere to the provisions of the NDPS Act and related guidelines and to ensure prompt reporting and follow-up of drug-related cases. Regular monitoring, data sharing and periodic review meetings were stressed to assess progress and address emerging challenges.

The Deputy Commissioner also emphasized the need for a coordinated and proactive approach to curb the menace of narcotic drugs and psychotropic substances. Stress was laid on intelligence sharing, timely information flow, and joint operations among enforcement agencies to ensure effective action against drug networks operating within the district, a press release from DC, SA said.
